

Date	Name	Task	Remark
10/4/2026	Avinash	1. Developed three services and performed curd operations 2. Handled exceptions during curd operations	completed
11/4/2026	Avinash	week day off	
12/4/2026	Avinash	week day off	
13/4/2026	Avinash	Worked on Loan Core Service and implemented API Gateway for routing requests. Developed REST APIs, handled database operations, and integrated services using Eureka.	completed
14/4/2026	Avinash	Implemented Orchestrator and Audit service and tested APIs via postman Implemented Resilience4j Rate Limiter and Circuit Breaker with fallback handling, integrated Audit Service via WebClient, and worked on Orchestrator service with idempotency support to ensure stable loan processing. Also attended a session in which learn about project setup and basic understanding about JIRA	completed
15/4/2026	Avinash	completed The Loan Processor mini project, Did project set up and understand the project structure	completed
16/04/2026	Avinash	Debugged customer enrollment and customer authorization modules and learn about swagger	completed
17/04/2026	Avinash	week day off	
18/04/2026	Avinash	week day off	
19/04/2026	Avinash	week day off	
20/04/2026	Avinash	Debugged customer modification and customer modification authorization modules also learn about liquibase, saga and kafka	completed
21/04/2026	Avinash	Debugged CASA account opening module	completed
22/04/2026	Avinash	Debugged CASA account authorization, CASA modification and CASA modification authorization Atended the KT session and understand customer enrollment and CASA account opening flow and understand the workflow of FD account opening	completed
23/04/2026	Avinash	workflow of cash deposit entry module	completed
24/04/2026	Avinash	week day off	
25/04/2026	Avinash	week day off	
26/04/2026	Avinash	Debugged Customer close, customer close autjorization, customer close revoke entry, customer close revoke entry authorization models and unsderstand the flow	completed
27/04/2026	Avinash	Implmented an api to read the excel data	completed
28/04/2026	Avinash	created an UI to show the excel fetched data as a progress dashboard	completed
29/04/2026	Avinash	dashboard created	completed
30/04/2026	Avinash	Holiday	
1/5/2026	Avinash	week day off	
2/5/2026	Avinash	week day off	
3/5/2026	Avinash	week day off	
4/5/2026	Avinash	Created an UI to update activity in excel sheet and handles validations on UI	completed
5/5/2026	Avinash	Implemented an api to Update Activity in Excel Sheet	completed
6/5/2026	Avinash	Handles Validations before updating activity based on excell sheet cells type	completed
7/5/2026	Avinash	Implemented an ui to create aor add data in excel sheet and handles validations on UI	completed
8/5/2026	Avinash	Implemented api that takes complete phase object and store it to the excel sheet	
9/5/2026	Avinash	week day off	
10/5/2026	Avinash	week day off	
11/5/2026	Avinash	Created a login page that displays page based on the user roles by handling logic at frontend	completed

12/5/2026	Avinash	Improved the dashbord that looks attractive and user can get idea of the project progress	completed
13/5/2026	Avinash	Added User registration screen in project that admin can register users and data of user is stored in temporary excel sheet	completed
14/5/2026	Avinash	Added an User Registration authorization screen and backend logic to authorize user	completed
15/5/2026	Avinash	Implemented security that the API`s can not get called directly from browser when user and admin login a token will be generated and based on that token and role they can perform operations	completed
16/5/2026	Avinash	week day off	
17/5/2026	Avinash	week day off	
18/5/2026	Avinash	Added an add activity screen in project that adds activity in existing data of excel	completed
19/5/2026	Avinash	project uploaded to docker made batch files to start and stop the project	completed
20/5/2026	Avinash	Added a manage users screen in project that admin can manage users by making activate and deactivate	completed
21/5/2026	Avinash	Debuged customer enrollment and explored tables when customer enrolled successfully	completed
22/5/2026	Avinash	Debuged	completed
23/5/2026	Avinash	week day off	
24/5/2026	Avinash	week day off	
25/5/2026	Avinash	Got JIRA and Confluence access and took overlook of Confluence documentation and JIRA	completed
26/5/2026	Avinash	Read documentation understand developepment/deployment guideline, coding standards, use of @Temporal annotation	completed
27/5/2026	Avinash	Gave Demo of Progress Dashboard and pointed down the improvements	completed
28/5/2026	Avinash	Created a dashboard page to display progress based on milestone of selective project with backend implimentation	completed
29/5/2026	Avinash	Implemented an API that fetches all activities and display them with the data and also implememnted API s to modify them	completed
30/5/2026	Avinash	week day off	
31/5/2026	Avinash	week day off	
1/6/2026	Avinash	Implemented an API of user management that can manage user based on role also created a web page to show users data	completed
2/6/2026	Avinash	Implemented an API to upload and export excel that admin can upload excel and it is save in db and also can export excel that creates and excel sheet with latest data and tested it from frontend	completed
3/6/2026	Avinash	Impleted an API to audit action performed by user and also created a web page for that which shows audits with odl and modified data	completed
4/6/2026	Avinash	Implemented API to generate report based on Milestone,Phase,Project,Task and subtask also based on status	completed
